REC'D 10 JUL 2003  
WIPO PCT

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

Signed *M. Jenkins*

# Request for grant of a patent

(See the notes on the back of this form. You can also get an explanatory leaflet, from the Patent Office to help you fill in this form)

1. Your reference JED1038

2. Patent application number 0213245.4  
(The Patent Office will fill in this part)

08 JUN 2002

11JUN02 E724638-2 D02806  
P01/7700 0.00-0213245.4

3. Full name, address and postcode of the or of each applicant (underline all surnames)  
Ian Robert THOMSON  
41 Marchioness Way  
St Neots  
PE19 8DL

Patents ADP number (if you know it)

If the applicant is a corporate body, give the country/state of its incorporation

4. Title of the invention Improved Garment

5. Name of your agent (if you have one) Barker Brettell  
"Address for service" in the United Kingdom to which all correspondence should be sent (including the postcode)  
St John's Innovation Centre  
Cowley Road  
Cambridge  
CB4 0WS

Patents ADP number (if you know it)

5. If you are declaring priority from one or more earlier patent applications, give the country and the date of filing of the or of each of these earlier applications and (if you know it) the or each application number

Country	Priority application number (if you know it)	Date of Filing (day/month/year)

7. If this application is divided or otherwise derived from an earlier UK application, give the number and the filing date of the earlier application

Number of earlier application	Date of filing (day/month/year)

Is a statement of inventorship and of right to grant of a patent required in support of this request (Answer 'Yes' if:  
a) any applicant named in part 3 is not an inventor, or  
b) there is an inventor who is not named as an applicant, or  
c) any named applicant is a corporate body.  
See note (d))

## Warning

After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.

## Notes

- If you need help to fill in this form or you have any questions, please contact the Patent Office on 01645 500505
- Write your answers in capital letters using black ink or you may type them.
- If there is not enough space for all the relevant details on any part of this form, please continue on a separate sheet of paper and write "see continuation sheet" in the relevant part(s). Any continuation sheet should be attached to this form.
- If you have answered 'Yes' Patents Form 7/77 will need to be filed.
- Once you have filled in the form you must remember to sign and date it.
- For details of the fee and ways to pay please contact the Patent Office.

Patents Form 1/77

Improved garmentField of the invention

- 5 The present invention relates to a garment adapted to deliver vapourising decongestant to the wearer. The invention is applicable with particular advantage to sports clothing and in particular for clothing for children.

10 There are many different oils and creams available which are impregnated with a vapourising decongestant. Such creams and oils are intended for use on the skin such that the heat of the skin heats up the decongestant to slowly release decongesting vapour which can be inhaled to keep the nasal passages clear.

- 15 Such oils and creams can in some cases irritate the skin especially the delicate skin of children. Parents often rub such creams into the clothing of the child or impregnate a handkerchief with a decongestant oil. The amount of decongestant is not controlled and it can also ruin the clothes by staining them. In such cases the decongestant can also come into  
20 contact with the skin causing the same irritation.

Even professional sportsmen sometimes rub a slow release vapourising decongestant into their shirt. They have found that this can help to keep their head and nasal passages clear while indulging in their sporting  
25 activity, especially in cold weather.

Summary of the invention

- 30 According to the invention a garment includes a pad holder for receiving and holding securely a vapourising decongestant impregnated pad, the pad holder positioned such as to locate the pad in a position such that

vapourised decongestant may readily be inhaled by the wearer of the garment.

- 5 Typically the garment will be a shirt, sporting tops, pajama tops or all-in-one suits.

---

The pad holder is preferably a pocket into which the pad may be slipped and readily removed. It may have a closure to prevent the pad from falling out when the garment is worn, in particular during active sports.

10

Alternatively the pocket may be an open-topped pocket. Provided that the pad size is only just smaller than the pocket once in position when the garment is worn it will be held securely.

- 15 The advantage of this system is that the decongestant can be impregnated into the pad at exactly the correct concentration to deliver a recommended dose to the wearer. The pad may be readily removed from the holder for washing of the garment and for replacing after a predetermined time.

- 20 Preferably the pocket is on the inside of the garment to ensure that the heat of the skin can release the decongestant vapour. Typically the pocket may be of a net or mesh material which will hold the pad securely but allow the skin to be in contact with the pad. In the event that the decongestant used may irritate the skin of the wearer a light cotton material may be preferred.

25

- 24 JUN 2003  
THE PATENT OFFICE  
NEWPORT
- 30 Preferably the pad is of a shape and size to ensure that it is not heavy for the weight of garment material and that it is not obtrusive for the wearer. Conveniently the pad may be in a square or rectangular pillow shape with sides between 2cm and 16cm and depth between  $\frac{1}{4}$ cm to 1cm.

The choice of suitable vapourising decongestant will be apparent to the skilled addressee of the specification as will be the choice of appropriate material for the pad for receiving the decongestant. Typically a suitable material for the pad will be dependent on the decongestant formulation chosen.

Although the invention is applicable with particular advantage to sports garments such as football shirts, the invention may also be applied with advantage to children's night clothes - even baby clothes. There is a perennial problem of how to clear the nasal passages of a baby or young child and measures which will prevent the build up of mucous in their nose during the night hours.

In one embodiment of the invention, the pocket may be in the form of a bag having an iron-on surface which can be positioned on a garment as required by the user and then secured in position by ironing and activating the adhesive in the iron-on surface.

#### Brief description of the drawings

An example of a garment in accordance with the invention will now be described with reference to the accompanying drawing in which:-

#### Description of the preferred embodiment

A garment 1 includes a pad holder 3 for receiving and holding securely a vapourising decongestant impregnated pad 5, the pad holder 3 positioned such as to locate the pad 5 in a position such that vapourised decongestant may readily be inhaled by the wearer of the garment.

In this case the garment is a sports shirt with the pad holder 3 positioned at the centre of the front of the garment just below the neckline to ensure that the vapourised decongestant can readily be inhaled by the wearer of the garment.

5

The pad holder 3 is in this case in the form of an open-topped pocket 7 of net material. The dimensions of the pocket are 12.5cm by 15.5cm and the dimensions of the pad are 7.5cm by 10cm.
